

Speech podium or pedestal for laptop

Posted by admin - 13 Sep 2011 09:44

This speech podium is light weight, fold up, and a portable podium for anyone, who has needs to use support for work sheets, while reading them in the standing position next to a table. I use it all day everyday at work, to support my laptop, so I can work in stand up position behind sales counter.

To use this Speech Table, simply unfold top and sides and lock them in position using pens and holes. Place it on any kind of table and it is ready to use.

When not in use, the Speech Podium folds back up again and a handle on the "spine" of this podium makes a nice way to carry this podium anywhere it's needed, just like a briefcase.

Podium is made from wood, likely Oak. Bras or chrome piano hinges are used . The handle is attached on the "spine " by screws and the style and material can be adjusted to your needs. Wood is finished and it's all is sealed for final protection. Speech podium is in the stage of developing ,so it only gets better than the pictures you can see here.

Podium is made from wood, piano hinges, handle, finish, and sealer.
